### Is it possible to break a long line to multiple lines in Python?

The preferred way of wrapping long lines is by using Python's implied line continuation inside parentheses, brackets and braces. If necessary, you can add an extra pair of parentheses around an

### [JSONDecodeError: Expecting value: line 1 column 1 \(char 0\)](#)

JSONDecodeError: Expecting value: line 1 column 1 (char 0) also happens when the first line in the json response is invalid. Example response from running an az cli command is ["WARNING: The default

### What is the right way to create a horizontal line with HTML and CSS?

Learn how to create a horizontal line in HTML and CSS effectively.

### How can I do a line break (line continuation) in Python (split up a

The preferred way of wrapping long lines is by using Python's implied line continuation inside parentheses, brackets and braces. Long lines can be broken over multiple lines by wrapping

### [Enable the display of line numbers in](#)

### [How to identify the 4 lines of solar panels , NenPower](#)

Effective methods to identify the four key lines of solar panels include: 1. Understanding the functional purpose of each line, 2. Locating the

### [How to add a forced line break inside a table cell](#)

I have some text in a table and I want to add a forced line break. I want to insert a forced line break without having to specify the column width, i.e. something like the following:  
`\\begin{tabular`

### [Visual Studio](#)

I know that the number of lines of code in a program doesn't matter, but sometimes it is nice to know how long a program is or the number of a particular line for reference. Though I tried, I can't seem to

### [Insert a new line without \newline command](#)

You can use `\par` to obtain a new paragraph. It is different from `\newline` or `\\` which produce a line break (by the way, there is a `\linebreak` command, to break the line and justify the line before).

### [Difference between CR LF, LF and CR line break types](#)

The Line Feed (LF) character (0x0A, `\n`) moves the cursor down to the next line without returning to the beginning of the line. This character is used as a new line character in Unix-

based

## How do I trim leading and trailing whitespace from each line of some

I would like to remove all leading and trailing spaces and tabs from each line in an output. Is there a simple tool like trim I could pipe my output into? Example file: test space at back test

## [What Are The Grid Lines On Solar Panels For?](#)

Grid lines are carefully engineered to collect and move the electricity generated by each solar cell. They gather the electric current and guide it
