I have been looking around for a while but unable to find an answer to my question. In Excel, what compact formula can I use to create an array made up of a single element repeated n

[Constant Climate Chambers , Cincinnati Sub Zero](#)

Whether your testing is for R&D, shelf life, accelerated aging or steady-state testing, our constant climate chambers provide a stable, temperature/humidity

How to use the PI constant in C++

I want to use the PI constant and trigonometric functions in some C++ program. I get the trigonometric functions with include . However, there doesn't seem to be a definition for

How do I create a constant in Python?

How do I declare a constant in Python? In Java, we do: public static final String CONST_NAME = "Name";

Define constant variables in C++ header

A program I am working on has many constants that apply throughout all classes. I want to make one header file "Constants.h", and be able to declare all the relevant constants. Then in my other cla

Constant Climate Cabinet , Environmental Test Chambers , Products

Our Constant Climate Cabinet (Desk-top Temperature & Humidity Chamber), which

supports temperature and humidity tests in laboratories and research rooms using a network.

Is it possible to use `std::string` in a constant expression?

Be aware that whenever you pass this constant to a function taking a `const std::string&` a new `std::string` has to be constructed. That is usually the opposite of what one had in mind when creating a constant.
