

Differences between the master and slave controllers of the battery system BMS

智慧能源储能系统
Intelligent energy storage system

Overview

The BMS modules enable control of up to 16 battery strings. Complex system designs are hierarchically scaled and include BMS MASTER and BMS SLAVE modules, where BMS SLAVE modules exchanges data with the BMS MASTER module via built-in CAN communication.

Design of master and slave modules on battery

In this paper, a Battery Management System (BMS) for lithium based batteries is designed that operates more efficiently and communicates with UART between

Master and Slave BMS

Decentralized BMS Architecture is split into one main controller (master) and multiple slave PCB boards. Consist of several equal units, which

How to Configure Master-Slave Communication Between Batteries?

This article mainly explains the configuration method and function of master-slave communication in 48V multi-battery systems.

[How Does Master Slave BMS Board Revolutionizes the](#)

Read on to learn more about the master-slave BMS architecture, and the basic installation components, and then get to know how to choose the right
