

Electric grid singapore

Overview

In 2019, around 95 per cent of Singapore's electricity is produced using piped or liquefied (LNG). Natural gas remains a key fuel for Singapore's power generation as it scales up efforts to harness solar and develop other low-carbon technologies. In 2025, electricity generation in Singapore via natural gas remained at 95 percent. In 2012, Singapore conducted a pre-feasibility study on the deployment of nuclear energy in Singapore.
