

Energy storage solar still growing

Overview

During the 12-month period from September 1, 2024, to August 31, 2025, utility-scale solar capacity grew by 31,706.1 MW, while battery storage grew 63.9% over the past year, adding 13,377.

Energy storage solar still growing

New materials could boost the energy efficiency of microelectronics

MIT researchers developed a new fabrication method that could enable them to stack multiple active components, like transistors and memory units, on top of an existing circuit, which

Solar Market Insight Report - SEIA

Solar accounted for 54% of all new electricity-generating capacity added to the US grid in 2025. Combined, solar and storage made up 79% of new capacity in this timeframe.

[What's the best way to expand the US electricity grid?](#)

Growing energy demand means the U.S. will almost certainly have to expand its electricity grid in coming years. What's the best way to do this? A new study by MIT researchers examines

Microsoft Corporation (MSFT)

Get the latest Microsoft Corporation (MSFT) stock news and headlines to help you in your trading and investing decisions.

[U.S. Adds 58 GWh of New Energy Storage Capacity in 2025](#)

Standalone storage made up nearly 30 GWh of new capacity added in 2025, while storage paired with solar accounted for 20 GWh. The residential energy storage sector added 3.1
