Aerodynamics and structural analysis of wind turbine blade

Both grid and time step were optimized to reach independent solutions. The present work represents the basis to develop an accurate three dimensional Horizontal-Axis Wind Turbine (HAWT)

examining how a wind turbine operates. The first method is to use momentum balance on a rotating annular stream tube passing through a turbine. The second

Explore a Wind Turbine

New animation shows how a wind turbine turns wind energy into electricity using the aerodynamic force from the rotor blades.
