

Island wind power generation ranking

Overview

This visual shows the top 15 countries by total installed wind turbine capacity, based on data from the Energy Institute's 2025 Statistical Review of World Energy report.

Island wind power generation ranking

Island

There are six major kinds of islands: continental (1), tidal (2), barrier (3), oceanic (4), coral (5), and artificial (6). Continental islands (1) were once connected to a continent. They still sit on the

Top 10 Countries by Wind Power Share in Electricity Generation

This ranking highlights the countries with the highest percentage of wind power in their annual electricity generation mix. As a critical renewable energy source, wind power plays a vital role

[Island , Definition, Types, Examples, & Facts , Britannica](#)

Island, any area of land smaller than a continent and entirely surrounded by water. Islands may occur in oceans, seas, lakes, or rivers. A group of islands is called an archipelago. Islands may

Global Wind Atlas

Tap on the map to set a marker. The Global Wind Atlas is a free, web-based application developed to help policymakers, planners, and investors identify high

Lists of islands

Walters Shoals, just south of Madagascar, was once a large tropical island. This article includes a geography-related list of lists.

Wind Power by Country 2026

Also includes information on each country's actual yearly production of wind-generated electricity, as well as the amount of electricity generated in offshore

Wind power generation, 2025

Annual electricity generation from wind is measured in terawatt-hours (TWh) per year. This includes both onshore and offshore wind sources.

Island

An island is any area of land which is smaller than the smallest continent and is entirely surrounded by water. Islands may be found in oceans, seas, lakes, or rivers.

[Islands Restaurants , American Restaurant in AZ & CA](#)

For over 40 years, Islands Fine Burgers & Drinks has been serving up the ultimate island-inspired dining experience. Known for our juicy burgers, fresh-cut seasoned fries, famous Mai Tais, and the coldest

[Ranked: The Top Countries by Wind Power Capacity in](#)

Below, we show the world's leading countries in wind power capacity in 2024: With nearly 522,000 MW of wind turbine capacity, China by far

[Visit Iceland , Official travel info for Iceland](#)

Expansive Glaciers. Shimmering Northern Lights. Hot springs and geysers. Vibrant culture and Viking history. Vast volcanic landscapes and black sand beaches.

[List of countries by renewable electricity production](#)

This is a list of countries and dependencies by electricity generation from renewable sources. Renewables accounted for 32% of electric generation in 2024. Renewables consist of hydro (44%), wind (25%), solar (22%), biomass (6%) and other renewables (1%). In 2023 China produced 32% of global renewable electricity, followed by the United States (11

Island

An island is an area of land surrounded by water on all sides that is distinct from a continent. There is no standard of size that distinguishes islands and continents.

24 World's Best Islands to Visit for 2026 , U.S. News Travel

Sprawling beaches, rich cultures and untouched pockets of wilderness are just a few alluring characteristics of the best islands in the world.

Wind electricity generation

Wind electricity generation, billion kilowatthours, 2022: The average for 2022 based on 189 countries was 11.16 billion kilowatthours. The highest value was in

Country Rankings

This dashboard ranks countries/areas to their renewable energy power capacity or electricity generation. The data can be further refined based on region, technology or year of interest.

Iceland

Iceland is warmed by the Gulf Stream and has a temperate climate, despite being at a latitude just south of the Arctic Circle. Its latitude and marine influence keep summers chilly, and most of its islands
