World's most viewed site on climate change, global warming, extreme weather, IPCC, NOAA, NASA, Arctic sea ice, urban heat islands,

What Is Longitude and Latitude?

Often called parallels or circles of latitude, latitudes are imaginary circles parallel to the equator. On a map where north is up, latitudes run laterally (left to right).

GPS coordinates, latitude and longitude with interactive Maps

Find the GPS Coordinates of any address or vice

[GPS coordinates, latitude and longitude with interactive](#)

Fill the address field and click on "Get GPS Coordinates" to display its latitude and longitude. The coordinates are displayed in the left column or directly on the

versa. Get the latitude and longitude of any GPS location on Earth with our interactive Maps.

Latitude and Longitude Explained: How to Read Geographic Coordinates

What is latitude? While lines of latitude run across a map east-west, the latitude indicates the north-south position of a point on earth. Lines of latitude start at 0 degrees at the equator and

[Optimal Winter and Summer Settings of Solar](#)

This research calculates the optimal tilt angles of photovoltaic panels for 60 locations in 60 countries around the world. These angles are

Latitude and Longitude Finder

Latitude and Longitude Finder. Find longitude and latitude, GPS coordinates, DMS, UTM, Elevation for your current location or any point on Earth.

The environmental factors affecting solar photovoltaic output

These new growth areas have diverse environmental conditions, where factors like higher temperatures and aerosol concentrations strongly impact solar power production. A comprehensive

GPS Coordinates

Latitude is the angular distance of a place north or south of the earth's equator. The degree of the angle is between -90° and 90°. Longitude and latitude coordinates are usually expressed in degrees and

Solar Panel Angle Calculator

Solar Panel Angle Calculator estimates the best solar panels angle (tilt) for your zip code, based on Latitude and Sun Hours. Simply enter you zip code, and you will

Latitude and longitude , Definition, Examples, Diagrams, & Facts

Latitude is a measurement of a location north or south of the Equator. In contrast, longitude is a measurement of location east or west of the prime meridian at Greenwich (an imaginary north-south

What is latitude?

Latitude measures the distance north or south of the equator. Latitude lines start at the equator (0 degrees latitude) and run east and west, parallel to the equator.
