

Microgrid planning and configuration

Overview

This paper covers tools and approaches that support design up to and including the conceptual design phase, operational planning like restoration and recovery, and system integration tools for microgrids to interact with utility management systems to provide flexibility and grid.

What are microgrids - and how can they help with power cuts?

Microgrids can step in when the main electricity grid fails. And as they can be powered by renewables, they are a sustainable and affordable option, too.

This bike path in the Netherlands is made from plastic waste

Dutch cyclists rode down the world's first bike path made entirely of discarded plastic this week, in a move aimed at reducing the millions of tonnes wasted every year.

These Dutch microgrid communities can supply 90% of their energy

Local communities generating their own power could become 90% energy self-sufficient, with potential to be fully self-reliant in the future, according to a Dutch study.

Normally, a fifth of global gas and oil trade passes through this chokepoint. That's 20 million barrels of oil a day. But why are people talking so much about this one small waterway - and how

Microgrids can secure electricity supply during disasters , World

Renewables-based microgrids and peer-to-peer (P2P) energy trading can boost energy security as they are self-sufficient and run independent of large grids.

The start-up tackling Nigeria's reliable power challenge , World

Amid an electricity crisis, many Nigerian small businesses run on petrol generators. This solar-microgrid start-up is working to connect them to clean energy.

[The small island states making big strides towards net zero](#)

Pacific small island states, contributing only 0.03% of global emissions, are leading with ambitious renewable energy projects and net-zero goals by 2050.

[How buildings can solve energy security as demands surge](#)

Surging energy demands and prices of buildings are turning leaders to efficiency retrofits to reduce energy costs and improve long-term energy security.
