

More photovoltaic power generation and energy storage are promoted again

More photovoltaic power generation and energy storage are promoted

Quarterly Solar Industry Update

The International Energy Agency projects significant growth for photovoltaics (PV) in 2024 over the record-breaking year in 2023. Over the next two years, virtually all new electric

[Executive summary - Renewables 2025 - Analysis](#)

The increase in solar PV capacity is set to more than double over the next five years, dominating the global growth of renewables. Low costs, faster permitting

Today in Energy

In 2024, generators added a record 30 GW of utility-scale solar to the U.S. grid, accounting for 61% of capacity additions last year. We expect this trend will continue in 2025, with 32.5 GW of new utility

REPORT: Solar Adds More New Capacity to the Grid in 2024 Than

According to the U.S. Solar Market Insight 2024 Year in Review report released today by the Solar Energy Industries Association (SEIA) and Wood Mackenzie, solar and storage account for
