

# Source Grid Load Storage Wind and Solar

## Source Grid Load Storage Wind and Solar

---

### Copy file to same path as source without changing directories

For example if you started typing or copy/pasting the source path including filename, and only after that you realize you want the copy to be in that directory, ctrl-left-arrow to move the cursor

### [How to compile and install programs from source](#)

That being said +1 bump for asking a common question that should be answered for all newcomers to \*nix systems. :) Building from source sometimes means the difference between fixing a nasty bug

### [How to know the source repository of a package in debian?](#)

The Debian maintainers are packaging the source code by incorporating their patches relative to some upstream software repository. That upstream software repository uses (or perhaps not) the version

### [Collaborative Planning of Source-Grid-Load-Storage](#)

This paper proposes a new power system planning method, the collaborative planning of source-grid-load-storage, considering wind and

### [Is there an open source tool to measure cpu performance?](#)

I have used many times ab for measuring web performance, hdparm for measuring hard disk performance and netperf for measuring network performance. But I didn't find any tools to measure

### **Why can 'BASH\_SOURCE' be used to obtain the current directory of**

I've read that BASH\_SOURCE should be populated with the name of the executing script (and it works!). But why does BASH\_SOURCE hold the name of the executing script, when it is

### **A Multi-Period Source-Storage Coordinated Planning Considering**

With fast growing renewable generations, source-grid-load-storage (SGLS) integrated systems have emerged in recent years. The economical feasibility of SGLS system is still a

### [Explained: Maintaining a Reliable Future Grid with More Wind](#)

The figure demonstrates the importance of storage and solar meeting summer demand, and it captures the modest contribution of wind (and solar in the winter) to meeting peak demand accounted for in

### [After installing oh-my-zsh: `/.zshrc:source:34: no such file or`](#)

I just tried to install oh-my-zsh. I get the following error when I try to run rvm: zsh: command not

found: rvm I also get the following error when I try to open a

## **bash script error: source: not found**

You have an alias which is overriding the builtin source (fix with unalias source) You have a function which is overriding source (fix with unset -f source) You are somehow not using bash (although your

## **If "bash " works, why is "source " throwing an error?**

However, when you source something, it is run in your current shell which, because it is interactive, has already loaded the aliases and therefore the fi alias is recognized and breaks the

## **Where to download Linux Kernel source code of a specific version**

Is there a resource to download a specific kernel version source? For example, I want to get 2.6.36.2 sources to compare with this package and see what changes were introduced?

## [What is the difference between "." "./" and "source"?](#)

When the script is done, any changes that it made to the environment are discarded. . script The above sources the script. It is as if the commands had been typed in directly. Any
