[var functionName = function\(\) {} vs function functionName\(\) {}](#)

The difference is that functionOne is a function expression and so only defined when that line is reached, whereas functionTwo is a function declaration and is defined as soon as its

High Voltage Box in Energy Storage Systems, Industry, SolarMak

A high voltage box plays a vital role in large-scale energy storage systems, ensuring safe power collection, distribution, and reliable integration with the grid.

What is the (function () { }) () construct in JavaScript?

What these functions do is that when the function is defined, The function is immediately called, which saves time and extra lines of code (as compared to calling it on a separate line).

ENERGY STORAGE SYSTEM

Energy Storage Cabinet is a vital part of modern energy management system, especially when storing and dispatching energy between renewable energy (such as solar energy and wind energy) and
