std::future_status

Specifies state of a future as returned by wait_for and wait_until functions of std::future and std::shared_future. Constants

std::future::future

2) Move constructor. Constructs a std::future with the shared state of other using move semantics. After construction, other.valid() == false.

Mockito is currently self-attaching to enable the inline-mock-maker

I get this warning while testing in Spring Boot: Mockito is currently self-attaching to enable the inline-mock-maker. This will no longer work in future releases of the JDK. Please add
