

Tonga New Energy solar Panel Cadmium Telluride

Overview

Cadmium telluride (CdTe) photovoltaics is a (PV) technology based on the use of a thin layer designed to absorb and convert sunlight into electricity. Cadmium telluride PV is the only technology with lower costs than conventional silicon PV in multi-kilowatt systems. On a lifecycle basis, CdTe PV has the smallest carbon footprint and lowest water use.

Cadmium telluride (CdTe) photovoltaics is a photovoltaic (PV) technology based on the use of cadmium telluride in a thin semiconductor layer designed to absorb and convert sunlight into electricity. Cadmium telluride PV is the only thin film technology with lower costs than conventional solar cells made of crystalline silicon in multi-kilowatt systems. On a lifecycle basis, CdTe PV has the smallest carbon footprint, lowest water use and
