

**Which current is larger the solar panel current level I or I2**

## Overview

---

We are taught by manufacturers that inverters have balanced outputs; the current on L1 is the same as that on L2.

### **Inverter Current Conundrum , Information by Electrical Professionals**

All currents into a 'node' must equal the current out of the node. So for example if an inverter is a node with two circuit wires then the current on L1 and L2 must be equal.
